Notice of Allowability	10/049,388	MAKINO, JUN
	Examiner	Art Unit
	Brett S Squires	2836
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. This communication is responsive to <u>05/28/2002</u> .		
2. The allowed claim(s) is/are <u>1-14</u> .		
3. The drawings filed on are accepted by the Examiner.		
 4.		
 7. ☐ DEPOSIT OF and/or INFORMATION about the deposit attached Examiner's comment regarding REQUIREMENT Attachment(s) 1. ☑ Notice of References Cited (PTO-892) 	FOR THE DEPOSIT OF BIOLOGICA	
 2. ☐ Notice of Draftperson's Patent Drawing Review (PTO-948) 3. ☐ Information Disclosure Statements (PTO-1449 or PTO/SB/0 	Paper No./Mail Dat	 6. ☐ Interview Summary (PTO-413), Paper No./Mail Date 10/21/04. 7. ☐ Examiner's Amendment/Comment
Paper No./Mail Date <u>02/12/02</u> , <u>10/21/02</u> 4. ☐ Examiner's Comment Regarding Requirement for Deposit of Biological Material	8. ☐ Examiner's Stateme 9. ☐ Other	nt of Reasons for Allowance

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert C. Faber on October 21,2004.

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: the handwritten numbers, the voltage equations such as (E -0.7) and (E – 0.2), and reference characters such as "Path A" in Figures 1-9 are not plain and legible, and will be corrected with clear and legible replacements. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the

Art Unit: 2836

drawing figures. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Claims 1-14 are allowed over the prior art.

The following is an examiner's statement of reasons for allowance: the closest reference Pearson (US 4,344,194) discloses a switch circuit for controlling the power supply to a DC load. The switch circuit has a first transistor (figure 4 ref# Q) with its emitter coupled to the power supply and its collector coupled to the load, an SCR switch (figure 4 ref# SCR) with its output coupled to the other side of the load and the power source and an activating input, first resistor coupled between the base of the first transistor and the input to the SCR switch (figure 4), and a momentary switch with its first terminal coupled to the activating input of the SCR switch (figure 4 ref# S2).

Pearson does not disclose a pulse generator coupled between the collector of the first transistor and the second terminal of the momentary switch and a capacitor device coupled between the collector of the first transistor and the output of the SCR switch. The specific location of the pulse generation device in combination with the rest of the circuit elements is the novelty of this invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/049,388

Art Unit: 2836

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brett S Squires whose telephone number is (571)272-2268. The examiner can normally be reached on 8am-5:30pm Every other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus can be reached on (571)272-2058. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
